

DATA MANAGEMENT

Kalamazoo - Reynolds is able to bring unmatched simplicity to the complex world of data management through datacentre-proven solutions for storing, managing, protecting, and retaining corporate data.

Data Storage

The family of fabric-attached storage (FAS) systems includes primary and secondary storage solutions for a broad range of SAN and NAS network environments - from large corporate data centres to medium-sized businesses, departments, and remote offices. Unified by specialised operating systems, these systems deliver unmatched flexibility, scalability, administrative simplicity, and storage utilisation for great price/performance. Through storage virtualisation systems, we can extend these capabilities to heterogeneous storage networks also bringing enterprise-class storage and data management capabilities to small businesses.

Data Management

On offer are a comprehensive software suite of management tools that are tightly integrated with Oracle®, SAP, and Microsoft® business applications for Windows®, Linux®, and UNIX® platforms to ensure high application availability and unparalleled administrator productivity.

Data Protection

Business continuity and disaster recovery solutions enable efficient mirroring and replication and help ensure maximum system availability. The data protection portfolio includes disk-to-disk, virtual tape, and heterogeneous solutions for high-performance backups and restores. Additionally, industry-leading security and encryption solutions provide maximum protection for sensitive corporate data.

Data Retention

Our unified archive and compliance solutions dramatically lower the cost and complexity of archival storage by combining archive and compliance capabilities on the same system. Our information classification and management solution simplifies and automates the management of unstructured data for data classification, migration, permanence, and discovery.

Dedication to Customer Success

We measure our success by the success of our customers. Every employee is dedicated to helping customers succeed. Through world-class services and support, we help organisations meet their business objectives and get full value from their investments.

Professional Services

Professional Services provides customised assessment, design, and implementation services to help customers optimise their storage and data management infrastructures. Our experts and partners work with our customers to turn their IT infrastructures into a competitive advantage.

Strategic Partnerships

Through partnerships with industry leaders, we can deliver complete, best-of-breed solutions that are tailored to meet the unique needs of each enterprise.

Applied Innovation

We are committed to delivering innovative solutions that help our customers improve business processes, reduce operating costs, and achieve competitive business advantages.

Architectural Simplicity

Through innovative unified storage architecture, using a single set of software and processes across all tiers of storage, we provide the most flexible and scalable storage platform in the industry. The simplicity of our approach helps lower cost and complexity to maximise the impact of every IT investment, while its flexibility makes it far easier for our customers to deploy new capabilities in response to changing business demands.

Industries

Storage and data management solutions are used in a broad range of industries. Market leaders the world over choose Kalamazoo - Reynolds to help them reduce cost and complexity, reduce risk, and adapt to changing business requirements.

Customer satisfaction is key to everything we do
