

PROJECT MANAGEMENT & ROLL OUTS

Are you struggling to cope with some of the more sporadic workload requests placed upon your department? Requests such as equipment roll outs, hardware and software upgrades, installations, equipment moves, audits, complete relocations to new premises? Perhaps your department is suddenly in need of an extra pair of hands just for one day a week, or for several weeks, or even several months?

With the ever-changing nature of business demands and expectations, coupled with rigid financial controls, it's incredibly difficult to have the right people with the right skills available in the right places at the right time, for projects that have a finite life-cycle.

Kalamazoo - Reynolds can help you with these requests. We have people who have been delivering these very services throughout the UK, quietly, proficiently and professionally. If you would like us to project manage the work, we have qualified people who can do just that.

We'll blend with your IT team, work the way you want, keep you updated throughout, and deliver your task or project just the way you want it. We have the people, the national coverage, the capability and the commitment to excellence that you need and deserve.

Examples of successful projects:

- WAN migration involving 100+ engineering days
- Hardware and software upgrades to 1300 sites
- 100 site WAN migration
- 200+ site hardware upgrade
- 200+ site software upgrade and communication link

Customer satisfaction is key to everything we do
